FIELD NOTICE – 10th January 2022

UK NEQAS Haematology distribution 22A

Cytochemistry /Haemosiderin survey 2201CY

As per the field notices dated the 11th January and 4th August 2021, we are redesigning this survey due to the challenge in sourcing material.

We were pleased with the success of our first digital CY trial in September 2021 which was made available on our EQATE Digital Morphology platform from Monday the 6th of September 2021.

The next digital pilot case will be released in the first part of 2022.

For those who are already participants on the EQATE Digital morphology platform, or who signed up for the CY digital pilot in 2021, there is nothing further you need to do.

For those that do not currently participate in the EQATE Digital morphology and would like to trial this cytochemistry survey pilot, please register for an account by clicking on 'Apply' on the login page to the EQATE Digital Morphology website - this will take you to an application screen:

<https://eqate.ukneqash.org>

Please then select 'Organisation annual membership' and follow the instructions (please enter CY as the purchase order number, as there is no additional fee for this program, and the current PRN for your laboratory, as assigned by UK NEQAS Haematology).

Once you have submitted your details, we will be of your account application. You will receive an acknowledgement email with your username so that you can set a password to enable access to the system.

If you have any questions or concerns, please contact me on +44 (0)1923-587 111 or email: haem@ukneqas.org.uk

With best regards,

Barbara De la Salle PhD Director, UK NEQAS General Haematology
